 PO Number:  
 Date In: 01/10/2019  
 Date Out: 01/31/2019

## Brakes

### Customer States:

Towed In  
 Reports active leakage at passenger side front brake hose.  
 Reports humming noise under braking.  
 Report concern about tire balance.

### Diagnosis:

Removed tires and inspected all brake pads at 10mm or 98% Noticed low fluid and found right front brake steel braided hose leaking and rubber looks melted. Recommend replacing both front steel braided hoses and recheck for cause of right front brake overheat..  
 Checked parking brake operation and found lever only pull a small amount and wont lock due to not pulling far enough. Parking lever not pulling far enough due to cable was bent and jamming up due to bad bracket position. Straightened out bracket and cable is free and handle locks up now but wheels still spin slightly and needs adjustment at the parking brake shoes. To adjust the parking brake shoes will need to remove rear calipers and rotors. (2.5hrs)

### Recommendation:

Replace both front brake hoses with correct length steel braided type.  
 Check brake system to determine if right front brake is getting hot.  
 Disassemble rear brake to adjust parking brake shoes.

### Labor:

Description	Techs	Extended
Remove wheels and inspect brakes. Inspect for fluid leakage at right front.	AO	390.00
Check parking brake operation. Adjust parking brake cable for proper operation.	AO	195.00
Replace both front brake hoses with correct length steel braided type and remove inspection.	AO	390.00
Disassemble rear brake to adjust parking brake shoes.	AO	585.00
Check brake system to determine if right front brake is getting hose.	AO	195.00
Parking brake not holding on hills.	GS	975.00
Fabricate parking brake cable.	GS	682.50

## Drivetrain

**Customer States:** Reports clutch has "notchy" release after clutch replaced. Check and report.

Labor:	Description	Techs	Extended
	Inspect clutch linkage and found the Z bar off at a forward angle causing the geometry to be off. Perform research and found a bracket that mounts to the bell housing for LS engine swap in early Corvettes with mechanical clutch linkage . Also found an adjustable clutch fork pivot is required to finish proper through adjustment and during installing new pivot found the clutch fork won't stay on the pivot and has a slight different angle then the Chevrolet performance unit that is for 1965 Corvette .	GS	200.00
	Re-locate clutch pedal pivot with new bracket. Remove transmission. Install new GM Performance clutch fork and adjust pivot.. Re-nstall transmission. Test drive and have smooth operation now at this time.	GS, AO	1405.00
