Ferrari 365 GTS/4 1973

s/n 16451

1973 Daytona Spyder S/N 16451. USA Model.

Excellent near new Ferrari red paint with recent tan interior and black inserts. Detailed ownership history from new. No crashes, no accidents, no stories. Runs and drives as new. An excellent car that needs no excuses made. Definitely priced to sell at \$329,500 obo.

Subject to possible prior sale.

Miles -
60,000

100 or much
Charles Polansky
831 582-9644
Main -
840 BMW
Eily 900

1971 Ferrari 365 GTB/4 Spyder S/N 14813

Weak points:

- Drivers seat needs leather work (Should do both.)
- Panels and Console need a big cleaning and some dye work. 300
- Rear Engine seal needs replacing.
- Small leak in Trans-axel.
- Smog pump has bearing noise. (Pump does work with belt in place.)
- Ride is hard, shocks needs rebuilding.
- Exhaust gasket leaks. Becomes less noisy when engine heats up

Positive Points:

Original Owner. Only 33k miles. (Real.) Owner picked car up in Modena. Had car flown from Milano. All documentation.

Dash looks very good. Done with Bell Aircraft material.

Original billing from factory. All paperwork.

Original leather pouch with books and all manuals.

5 or 6 different owners manuals. (Some items I didn't even know came with the Daytona.)

Extra set of Borrani wire wheels. Need to be re-done.

Paint will look very good after a professional detail.

Perma tune ignition works very good.

MOHR IMPORTED CARS

Featuring Fine Pre-owned Imported Cars Ferrari, BMW, Porsche,
Mercedes-Benz, Alfa Romeo, Jaguar

Dear Jan,

Last Thursday we received all carpeting from Modena.
Sending balance of money Tuesday for all leather and fabric for passenger compartment

27000
3500.00

No Labor.

Money wires from Bank of America and shipping

Paid

250.00

Oil leaks in engine turns out to be four leaky cam cover gaskets.
(Enclosed is worksheet.) While we had the cam covers off we
went ahead and adjusted the valves. (Which was only an additional \$240.00)
heater valve that was leaking. They also replaced the hoses that lead to it.

Total of that bill is

See Second Page invoice Fax

Paid

2008.68

Breaks:

To do the breaks total which includes rebuilding all four calipers,
four new break hoses, four new break lines and rebuilding of master cylinder
(I thought the labor price was reasonable.)

3762.00

~~See second page of fax~~

Change engine oil and filter,
parts
labor

Paid

124.00

80.00

TOTAL:

9724.68

Other items you might give attention to:

Rear Transaxle (Slow Leaks) Estimate 725.00

Rear Suspension bushings looked worn

but not dead yet. Estimate 2200.00

New or Rebuilt shocks for: 300.00 each

Detailing:

70 to 80 hours of detailing for show readiness.

(30 to 40 hours would be the minimum. I always like to do a little more.)

By the way, doing a yacht trip next year. Stella and I married 40 years.

Jan,

Hope everything went well in Sweden. I hope the right man wins the Indy 500.

By the time you read this we should have more prices on the Leather and some of

The mechanical. I don't have an exact number on the painting but I should be less than \$500.

AL

Mr. B. F. Falk

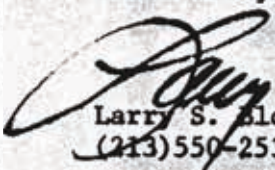

Re: Ferrari Daytona Bra

Dear Falk:

Obviously by your request to Joe Crevier you have refurbished your Daytona since the Laguna Seca mishap. I think at one time or another during one of the hill climb events or somewhere on one of our road trips you have seen the Ferrari Daytona Bras and, therefore, I hope need little information. In the event you do not, certainly I can supply that for you. The price of these bras are \$84.00 plus \$2.50 shipping which includes C.O.D. charges to you via United Parcel Service. There is also, of course, the State tax of 6%. If you wish to call me or drop me a note I would be more than happy to send the Bra directly to you where United Parcel could be directed. Would you please give me the appropriate address where you wish to take delivery.

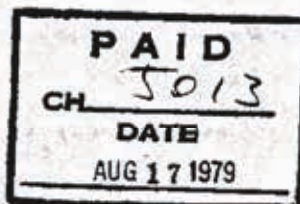

I can be reached daily at (213)550-2539 or at my home in the evening at (213)836-7453. I am glad to know you and your car are well and looking forward to hearing from you.

Yours truly,

Larry S. Bloomer

APR. ☐	AGO. ☐	DIC. ☐	1972 ☐

CONDIZIONI DI GARANZIA

Qualora si verificasse un difetto di funzionamento, far controllare l'impianto elettrico del veicolo e far caricare la batteria che risultasse scarica. La batteria che dopo la carica risultasse difettosa, entro i termini del periodo di garanzia, deve essere restituita alla FIAMM, o al più vicino rappresentante FIAMM, accompagnata dal presente cartellino.

La FIAMM provvederà alle riparazioni in garanzia solo se la batteria verrà restituita non manomessa o solo se verranno accertati difetti di materiali o di fabbricazione. Non verrà riconosciuta la garanzia qualora il difetto fosse da imputare a deficienza nella manutenzione.

DURATA DELLA GARANZIA:

Batterie per autoveicoli: mesi ☐ 6

Batterie per motocicli: mesi 6

FIAMM

CERTIFICATO GARANZIA BATTERIE

MESSA IN SERVIZIO DELLE BATTERIE CARICHE-SECHE

- 1) Tolto il nastro adesivo e levati i tappi, immettere negli elementi acido solforico, qualità per accumulatori di peso specifico 1,26 = 30° Bé a temperatura non inferiore a 15° C fino a che il livello superi di 5-10 mm. il bordo dei separatori o il paraspruzzi.
- 2) Lasciare a riposo per due ore.
- 3) Caricare con una intensità pari a circa 1/10 della capacità fino a che la tensione abbia raggiunto il valore di V. 2,7 circa per elemento (ossia di 8 e 16 Volt rispettivamente per le batterie da 3 e da 6 elementi), la densità dell'acido si aggiri intorno al valore di 1,27 = 31° Bé e tali valori siano rimasti costanti durante almeno 3 ore di carica. Normalmente sono sufficienti 6-8 ore di carica.
- 4) Finita la carica, livellare l'acido,appare e pulire accuratamente.

MANUTENZIONE DELLA BATTERIA IN SERVIZIO

- 1) Il livello dell'elettrolito deve sempre coprire le piastre. A tale scopo è necessario effettuare periodicamente delle aggiunte di acqua distillata. Non fare aggiunte di acido solforico.
- 2) Qualora si rendessero necessarie troppo frequenti aggiunte di acqua, far controllare l'impianto elettrico del veicolo: la batteria funziona in sovraccarica e si rovina rapidamente.
- 3) Un controllo all'impianto elettrico si rende necessario anche nel caso in cui la batteria sia soggetta a scaricarsi.
- 4) Quando la batteria con acido, nuova o già usata, rimane inattiva, effettuare ogni mese una carica di rinfresco.

Ferrari

365 GTB/4

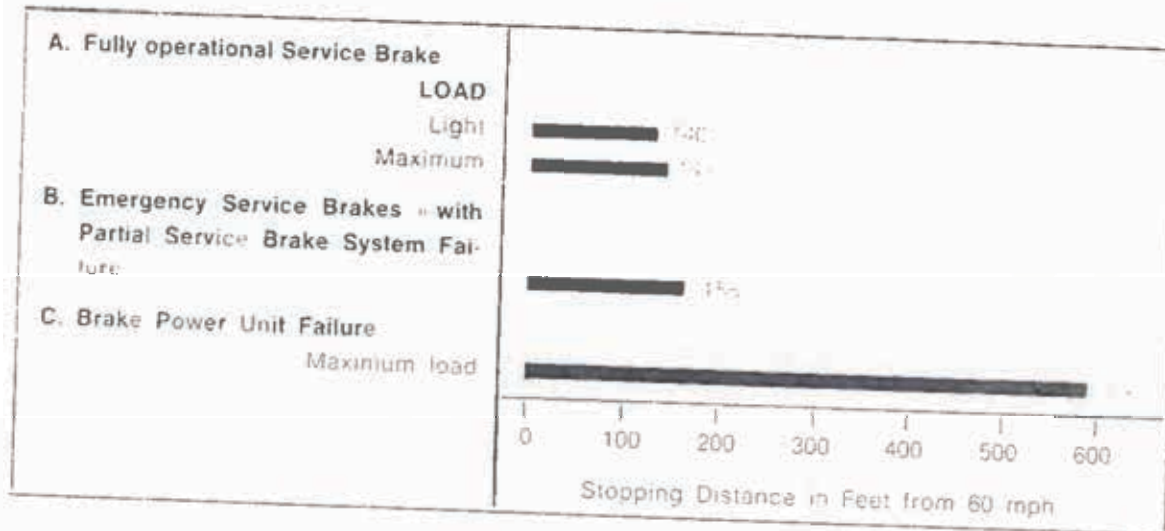

CONSUMER INFORMATION

PERFORMANCE DATA DETERMINED ACCORDING TO FEDERAL STANDARDS

1 - VEHICLE STOPPING DISTANCE

This figure indicates braking performance that can be met or exceeded by this vehicle, without locking the wheels, under different conditions of loading and with partial failures of the braking system. The information presented represents results obtainable by skilled drivers under controlled road and vehicle conditions, and the information may not be correct under other conditions.

Description of vehicle to which this table applies: 365 GTB/4

2 - TIRE RESERVED LOAD

This table lists the tire size designations recommended by the manufacturer for use on this vehicle, with the recommended inflation pressure for maximum loading and the tire reserve load percentage for each of the tires listed. The tire reserve load percentage indicated is met or exceeded by this vehicle.

Description of vehicle to which this table applies: 365 GTB/4

Recommended tire size designations	FR-70-15 optional marking 215/70 VR 15	
Recommended cold inflation pressure for maximum loaded vehicle weight (cold)	Front 34 p.s.i	Rear 36 p.s.i
Tire reserve load percentage	35,80%	
The difference, expressed as a percentage of tire load rating, between (a) the load rating of a tire at the vehicle manufacturer's recommended inflation pressure at the maximum loaded vehicle weight and (b) the load imposed upon the tire by the vehicle at that condition.		

WARNING. Failure to maintain the recommended tire inflation pressure or to increase tire pressure as recommended when operating at maximum loaded vehicle weight, or loading the vehicle beyond the capacities specified on the tire placard affixed to the vehicle, may result in unsafe operating conditions due to premature tire failure, unfavorable handling characteristics, and excessive tire wear. The tire reserve load percentage is a measure of tire capacity, not of vehicle capacity. Loading beyond the specified vehicle capacity may result in failure of other vehicle components.

3. ACCELERATION AND PASSING ABILITY

This figure and table present results from the 1965-1966 FHWA tests and reflect some variations from previous studies.

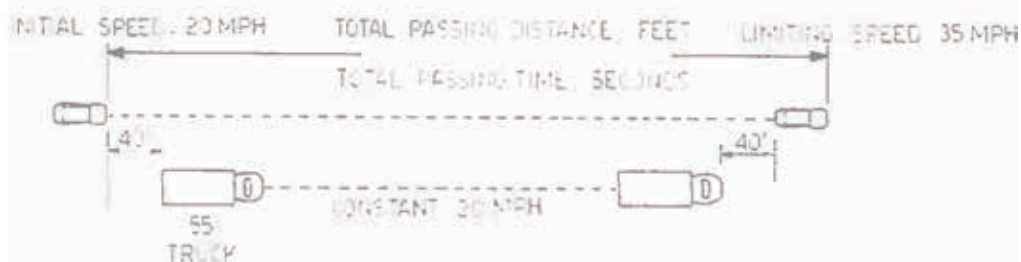

The low-speed pass assumes an initial speed of 20 mph and a limiting speed of 35 mph. The high-speed pass assumes an initial speed of 50 mph and a limiting speed of 80 mph.

The information presented represents results obtained by skilled drivers under controlled conditions and the information may not be directly applicable to all situations.

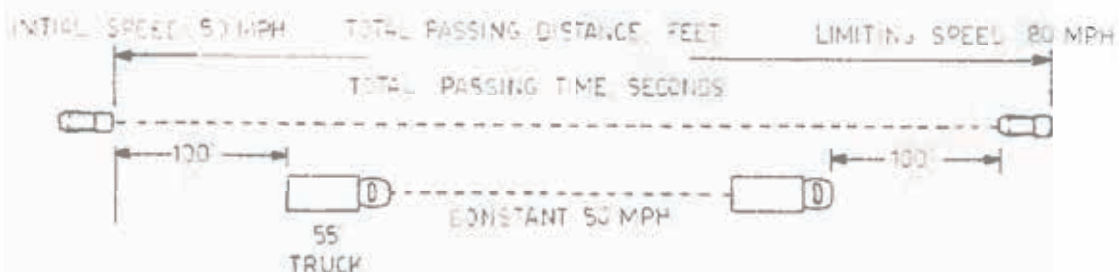

See Appendix A for more information on the table and figure.

Low-speed pass	334 feet 3.5 seconds
High-speed pass	820 feet 4.5 seconds

Issued to BALDINARI FALK.

concerning the car **Ferrari** model 365/GTS-4

Chassis N. 14813

Engine N.

Body SPYDER USA

Date of delivery 2 / MAR / 72

The delivery of the motor-vehicle the present card
refers to was carried out on _____

by _____

MODERN CLASSIC MOTORS

201 W. Second Street
RENO / NEVADA / USA

Ferrari

WARRANTY CONDITIONS

WARRANTY - FERRARI warrants its products of normal construction for twelve months starting from the date of delivery to the first owner, or 15.000 miles (25.000 Km.) whichever event occurs first.

This guarantee consists in the free supplying and replacement of parts defective because of verified defects in material or workmanship; its performance is subject to the examination of the defects and their causes exclusively on care of the Factory workshops or the shops authorized for such purpose and on their premises.

The supply and replacement of spare parts will be performed by FERRARI as soon as possible; an eventual delay will not be grounds for the customer to demand a compensation for damages or an extension of the warranty period. Tires and non-essential accessories are not covered by this warranty if they are made by a third party.

This warranty is null for the products eventually repaired, modified or simply dismantled outside the workshops of FERRARI or the authorized shops. It is also void for the products which might have been used in competitions or in discordance with the instructions of FERRARI; especially the weight limit and specified warnings.

The examination of damages and their causes will always be made by FERRARI workshops; all eventual travelling and transportation costs will be charged to the buyer. The buyer will be charged also for any investigation on the spot, if requested by him and accepted.

FERRARI does not warrant a motor-vehicle on which the body, made by a third party, is mounted, whenever the body exceeds the weight and dimensions indicated.

When the products owned by the buyer are, for any reason, in FERRARI workshops or in authorized workshops, FERRARI declines any responsibility for eventual damages caused by climatic factors, theft, fire, burglary, removals, requisitions etc. The data of weight, speed, gas-mileage and efficiency that can be supplied by FERRARI are approximative; the Factory does not take any formal pledge on their accuracy.

In none of the cases quoted in the previous paragraph, the buyer can claim the cancellation of the contract or compensation to damages or reimbursement of expenses.

JURISDICTION — In case of a dispute FERRARI agrees to, the Forum of Modena (Italy) is exclusively competent; drafts, acceptances of settlements and dispatches without or with C.O.D. do not constitute a derogation from this clause of jurisdiction even in case FERRARI should be pursued for concession or continence of cause.

When FERRARI is the plaintiff, it will be able to recur both to the Forum of Modena and to that where the other part resides.

NOTE - For the warranty, the customer must recur to the FERRARI authorized Service Agents.

The materials replaced during the warranty period are kept by FERRARI.

The factory is exempt from any responsibility for any accident to the people or things caused by the use of supplied goods and in dependence from the same; this clause is valid even during the testing period and even if an accident may occur from defects of material and workmanship.

FREE SERVICE COUPONS

Every owner of a **Ferrari** motor-vehicle has three free service coupons during the warranty period; the holder of the card must use the coupons in the periods prescribed.

Instructions for the use of the coupons

- Labor for the service indicated on each coupon is free.
- For the performance of services not included in the present coupons the general regulations of warranty will be applied.
- The coupons are not valid if they are not used during the warranty period and within the limits indicated.
- The coupons will be used preferably at the workshops of the dealer who sold the motor-vehicle.

The delivery of the motor-vehicle the present card
refers to was carried out on _____

IMPORTANT WARNINGS

I. - The directions for the maintenance of the motor-vehicle are detailed in the special operating, maintenance and service handbook supplied with every car. The customers are kindly requested to follow such instructions carefully.

II. - If in operating the motor-vehicle, irregularities are noticed, it is advisable to resort promptly to **Ferrari** authorized Service Agents.

III. - Original **Ferrari** parts must always be used.

IV. - The use of lubricants indicated by **Ferrari** is necessary for the lubrication of the engine and other parts of the motor-vehicle.
