

41 Cal Conv/ sedan

Dec 1989 '41 Cal. Conv.

1941 Cadillac Convertible

This vehicle is one of only 400 manufactured and was the last of the four door convertibles built by Cadillac. The vehicle had such unique features as built-in turn signals and sealed beam headlights. This was also the first year that a tail fin appeared on a Cadillac. The restoration was done by Penn Lennson and took two years and 1300 man hours to complete. The vehicle has won awards from Cadillac La Salle Club and Silverado Concours de Elegance. We welcome this beautiful vehicle to the 1997 Rose Parade.
