Ms. Susan L. Smith
11234 Memorial Drive
Houston, TX 77024

Dear Ms. Smith

I am delighted to hear that you have taken delivery of a new Volante. I write to welcome you into the very exclusive band of Aston Martin and Lagonda owners and hope that your new car will give you much pleasure, enjoyment and good service.

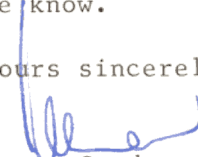

Our company has been making cars since 1914 and has always enjoyed a very close relationship with its owners. There is an active Aston Martin Owners Club which operates on a worldwide basis and there are meets held in the U.S.A. which are worth attending if you enjoy looking at fine automobiles. If you do not have details of the AMOC but would like to, please let me know.

The manufacturing process for our cars is unique in the automobile industry in that the entire construction is undertaken by hand. The bodywork of each car is hand-formed and coated with twenty-four layers of hand-rubbed lacquer. If you open the hood you will see on the righthand cambox cover a brass plate which bears the name of the engine builder who assembled your unit. He will have been responsible personally for the complete assembly and testing of the engine and the brass plate is a measure of his pride in a job well done.

If you ever visit England and would like to see how our cars are built I would be delighted to arrange a tour of our factory for you. Aston Martin Lagonda Limited is based at Newport Pagnell, Buckinghamshire, and is approximately 65 miles north of London.

If I can be of help or assistance to you in any other way, please let me know.

Yours sincerely

Peter Gaydon
Chairman
