Dear Jack & Cathy,

Just a short note to say thank you
for trusting me with the 19 project.

I thoroughly enjoyed working with
you on this project & look forward to the
final stage ... seeing how she flies!

Percy

It takes hours of deep thought and scientific research prior to beginning dissection of patient.

JUST
ANOTHER DAY

Patient in waiting room
prior to operation.

Cancerous body removed.

Skeleton revealed -
"X" rays showed deep tube trauma.

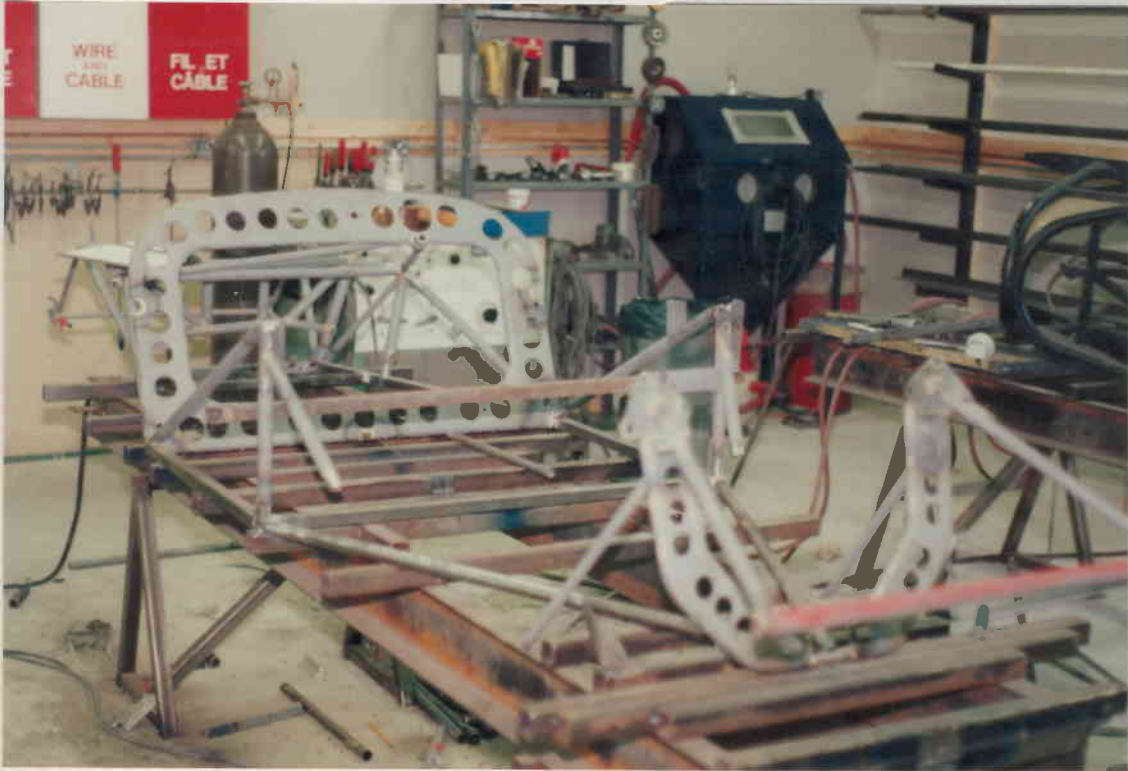

On table, new bottom rails are laid out,
while patient has had hers removed.

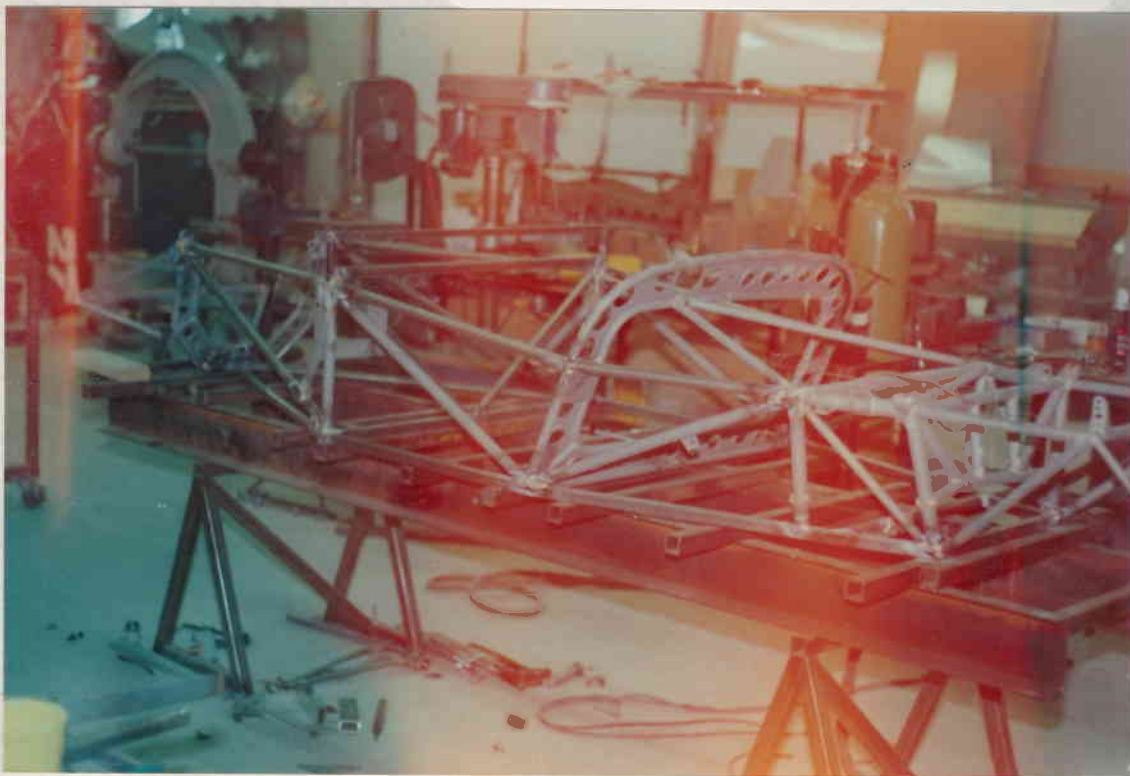

Marriage of new bottom rails to patient.

Another shot showing rear lower pickups removed. Front and rear subframes were subsequently removed.

Main section of chassis finished.

Fitting of nose to frame.

Door mounting to side pod jig.

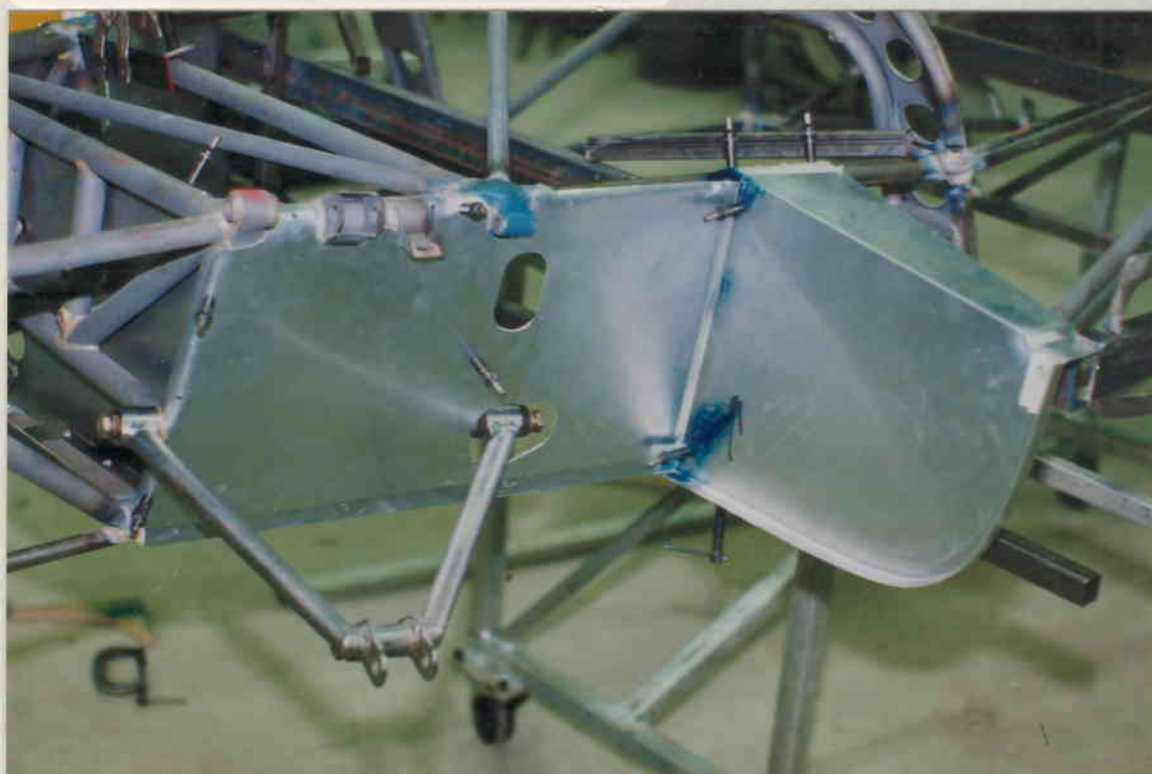

Tail section fitted.

Starting panel work.

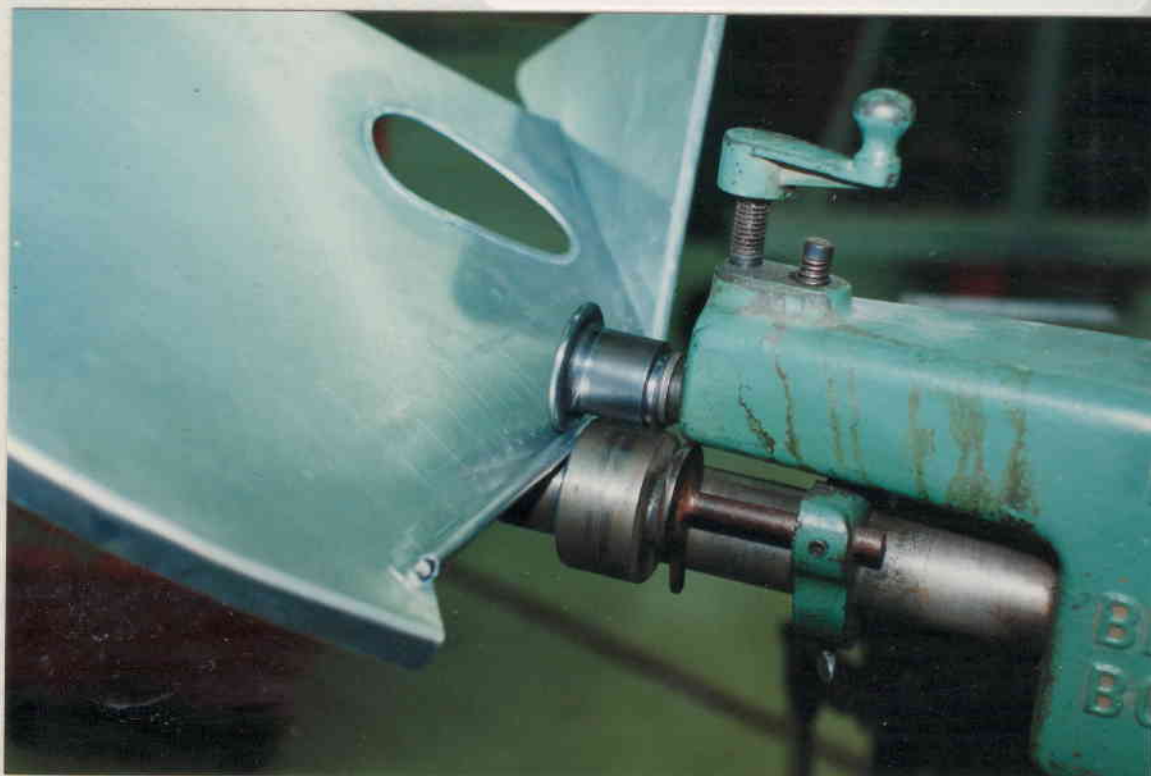

Adding pod skins.

New diaphragm panel
showing wood former.

Detail of wiring edge.

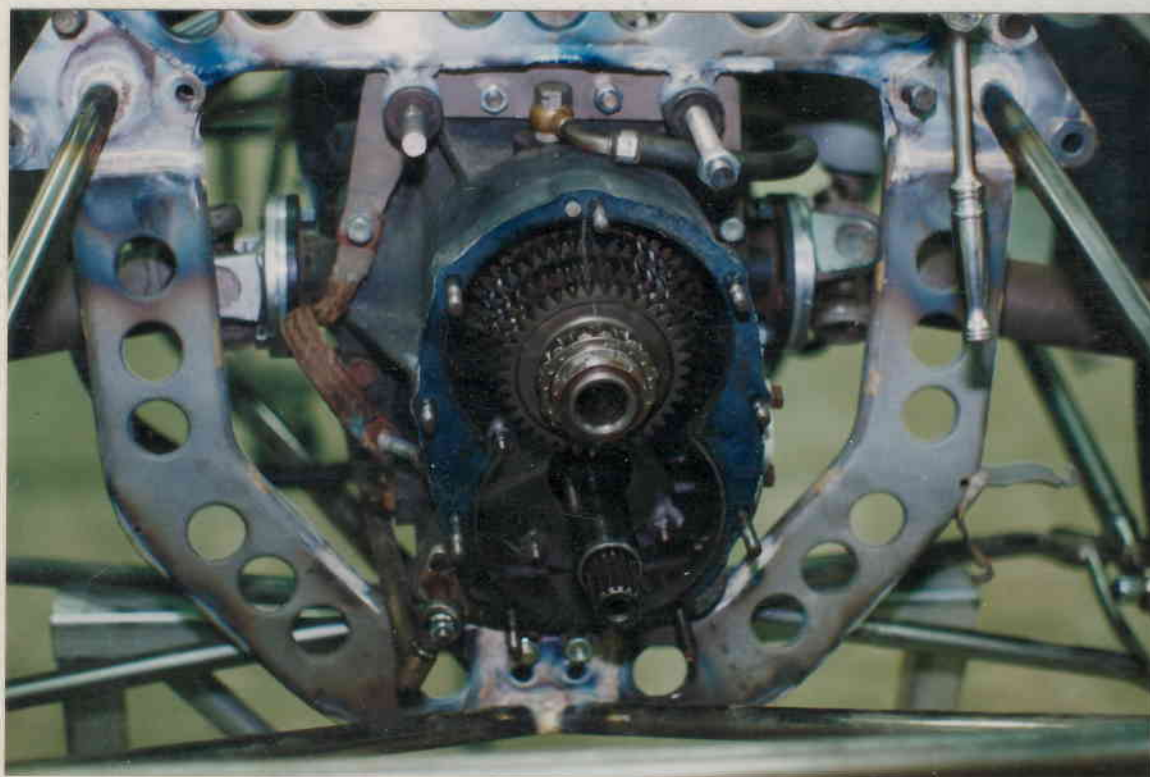

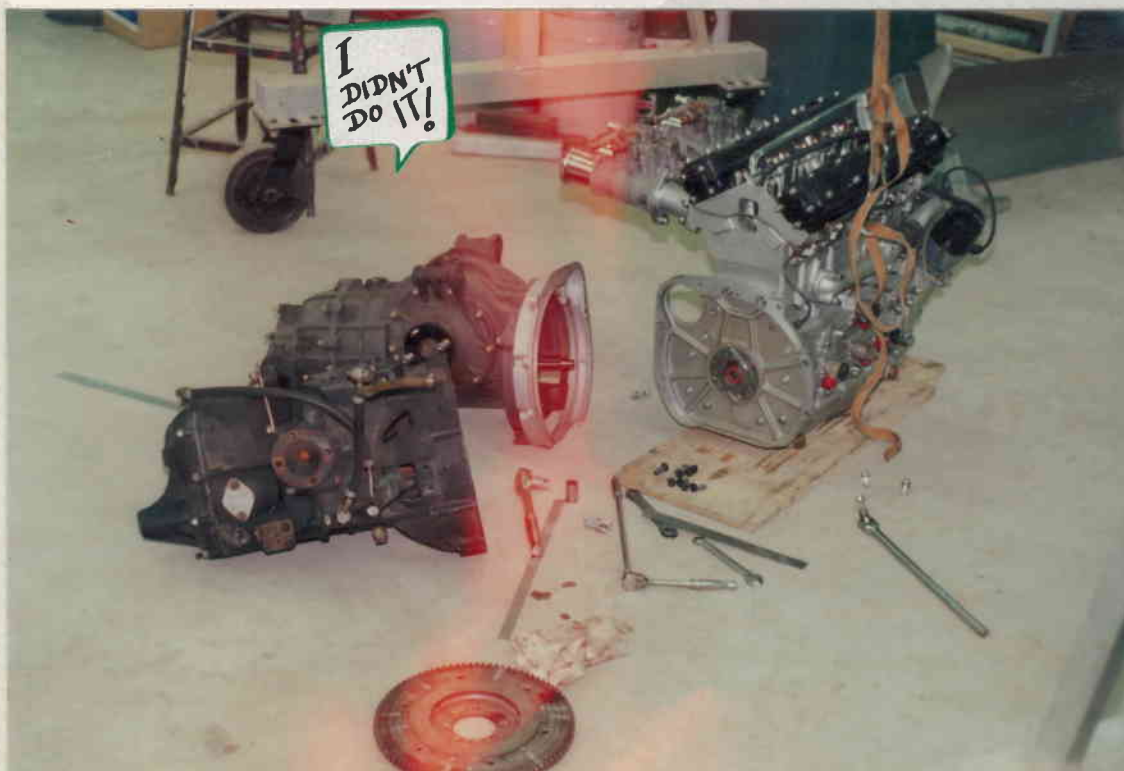

Complete pod assembly
tacked in place.

Wiring edges
of engine bay belly pan.

Ini meeni myni moe
Which gearbox?...

The "wonderful simplicity"
of the "queer" box.

Maybe we just forget the rollbar.

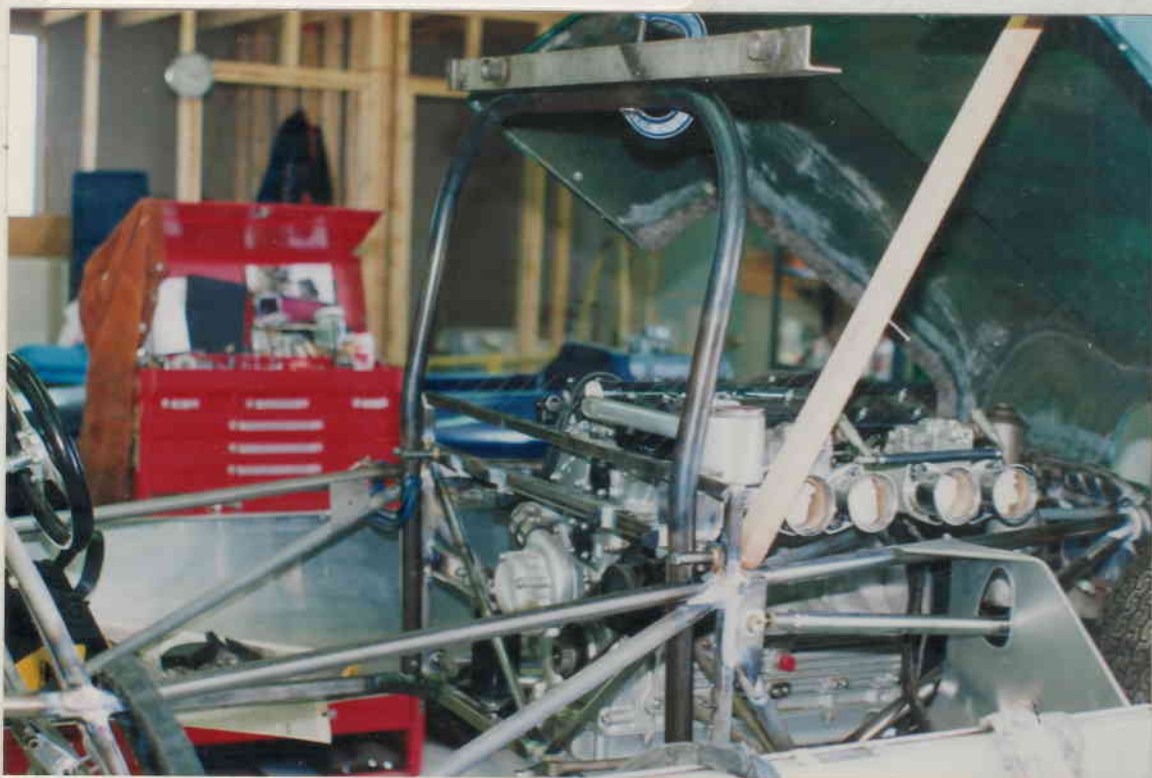

We fabricators have to learn how to handle drivers who can't leave home without their teddys.

Roll bar during bending process.

Molly guarding finished bar.

"I was worried about clearance
under the pedestrian bridge at
turn 4."

Tail section in process of receiv-
ing wheel spats showing aluminum
mold in place.

Aluminum inner skins
installed in nose.

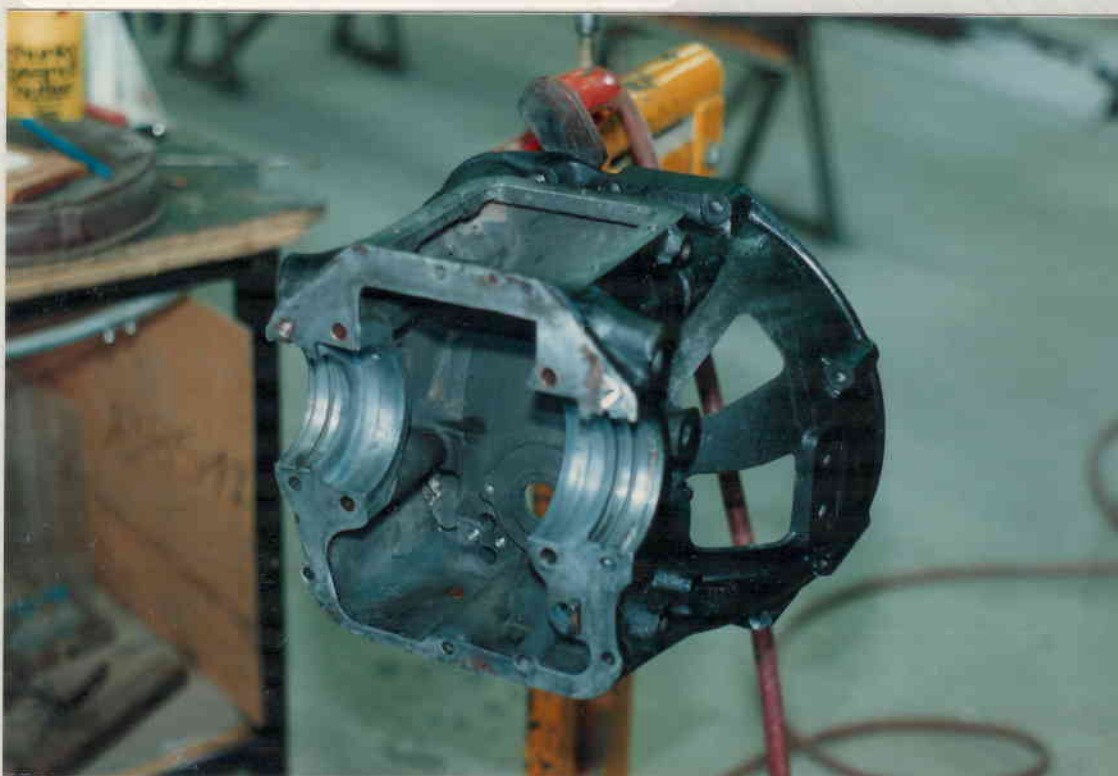

This car
is starting to grow on me.

Roll bar
seems to fit car rather nicely.

Tanning body prior to painting.

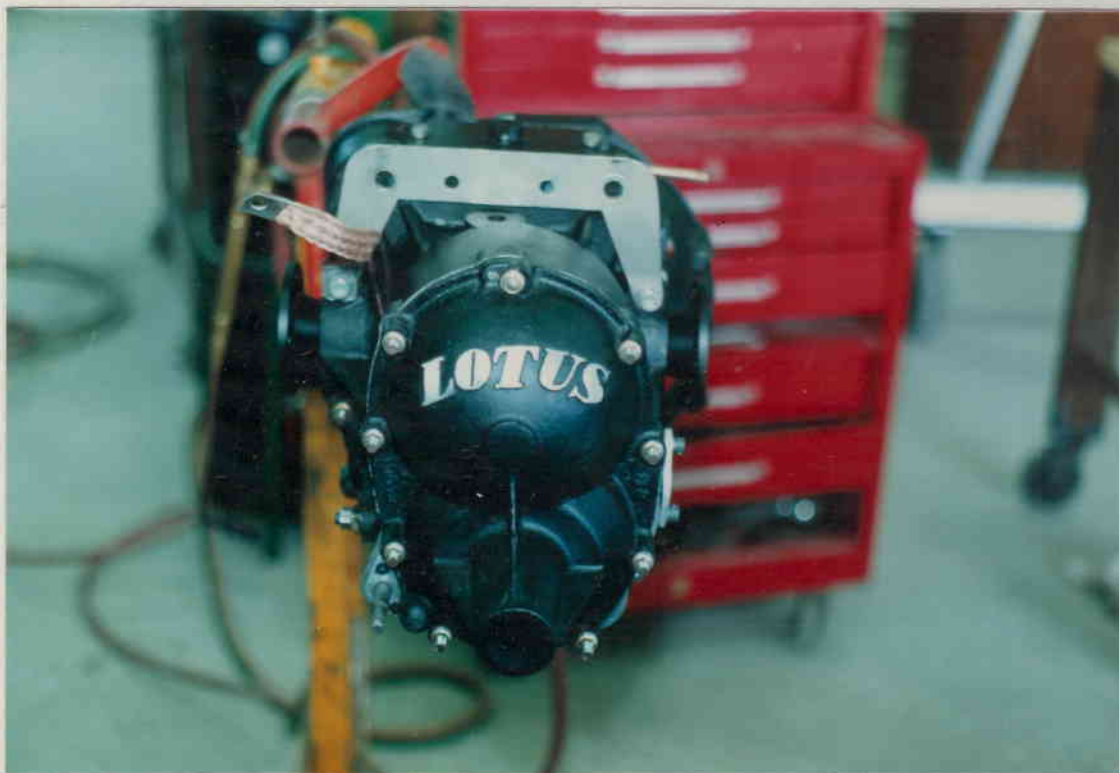

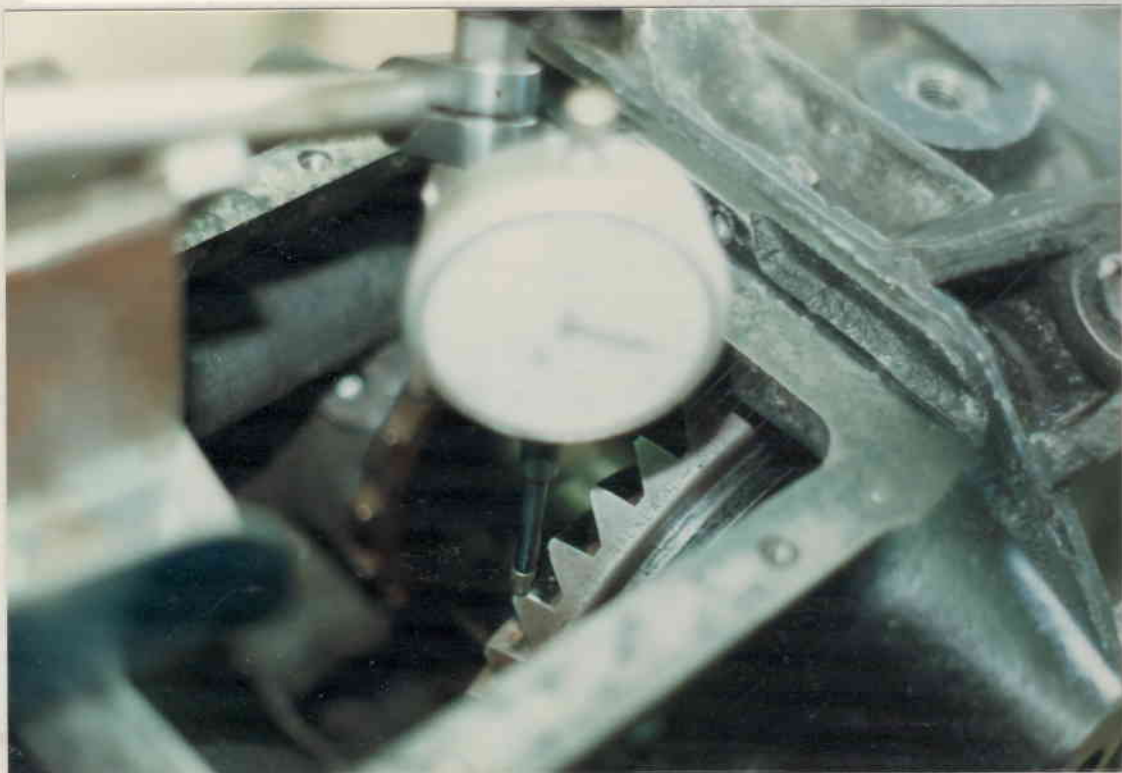

Forward half of gearbox case.

Detail of shifter detent.

Setting backlash.

Finished gearbox.....
...let us pray...

Mounting engine to gearbox.

Frame back from painters.

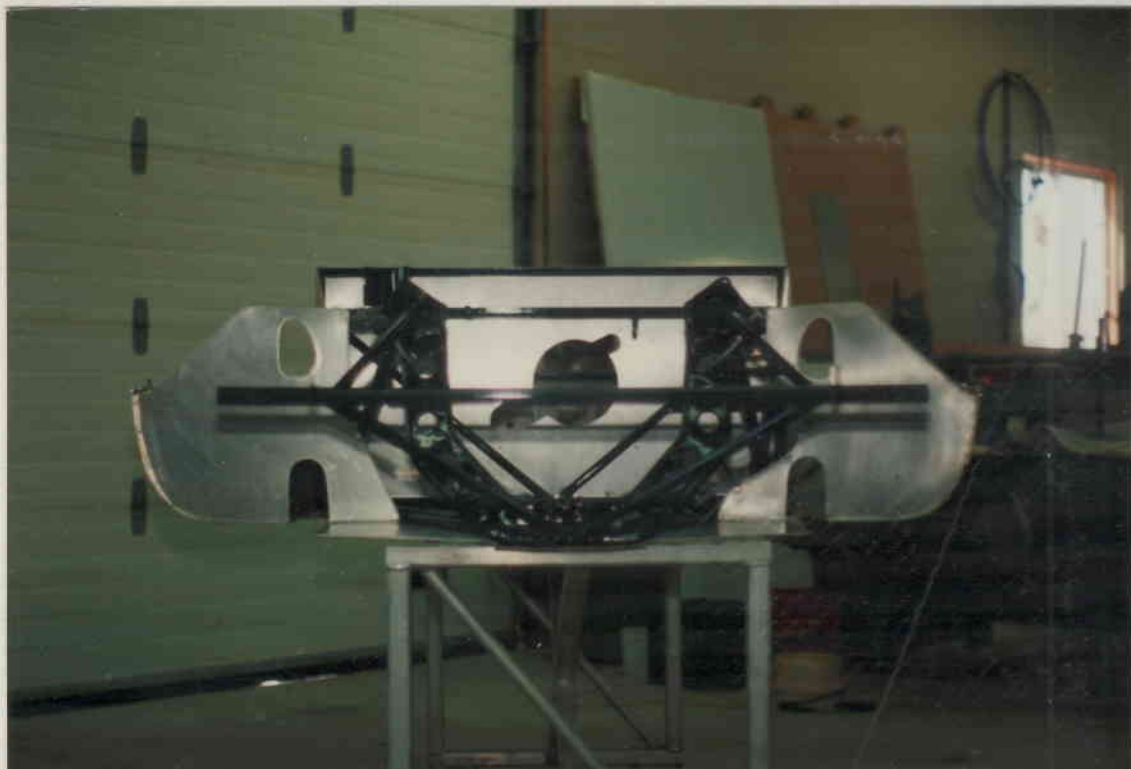

Side view of frame
....nice colour.

Floor pans attached.

Rest of panels
and side pods attached.

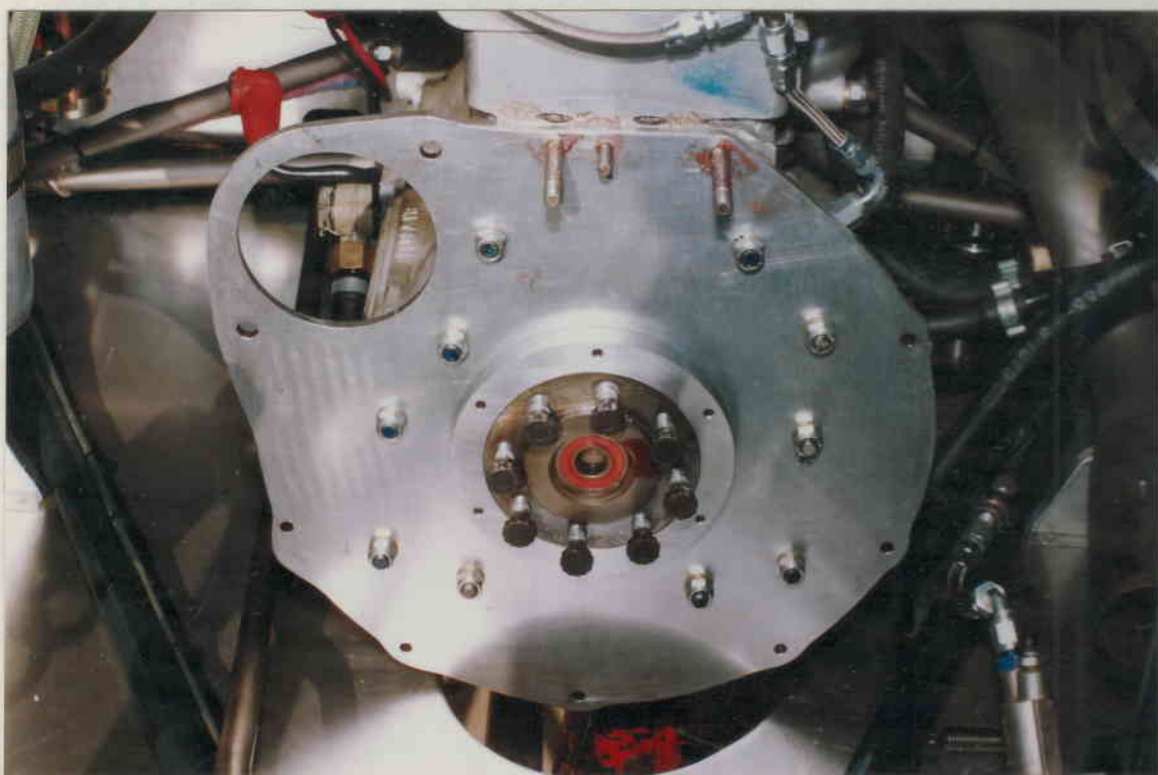

Rear view of basic structure.

Master cylinders and rack installed...apprentice mechanics are starting younger every year...

YES master
NO master

Detail of front suspension.

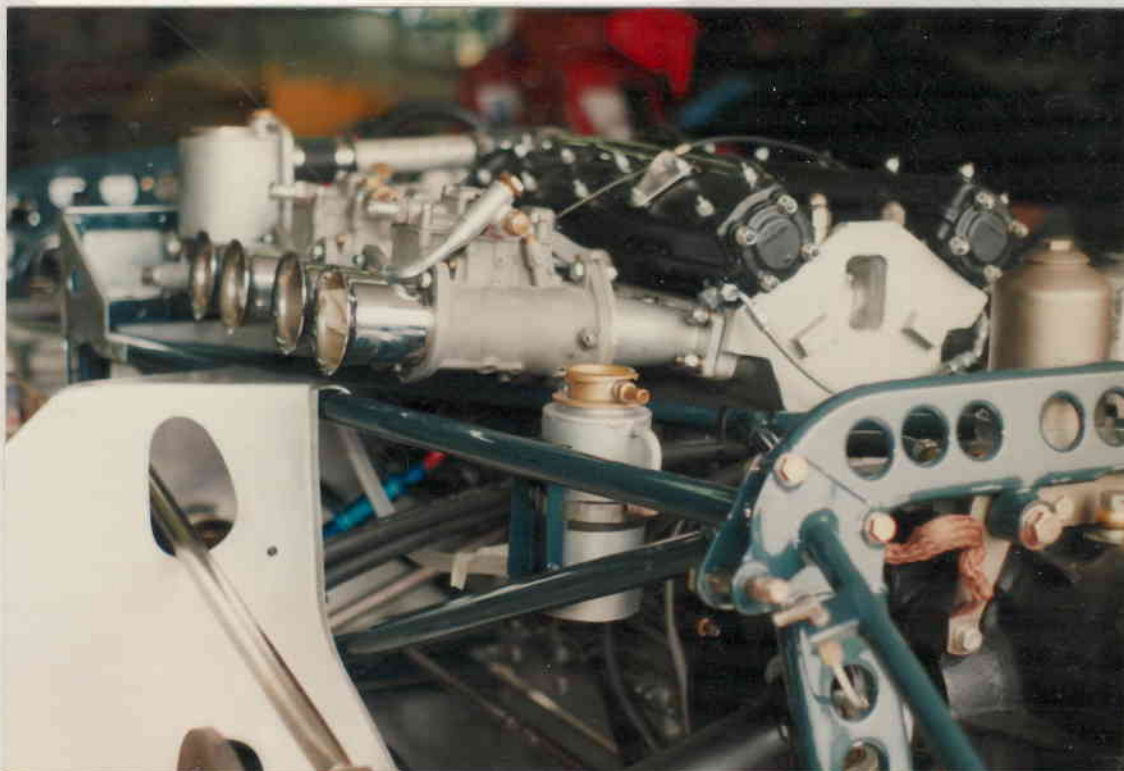

Gearbox adapter.

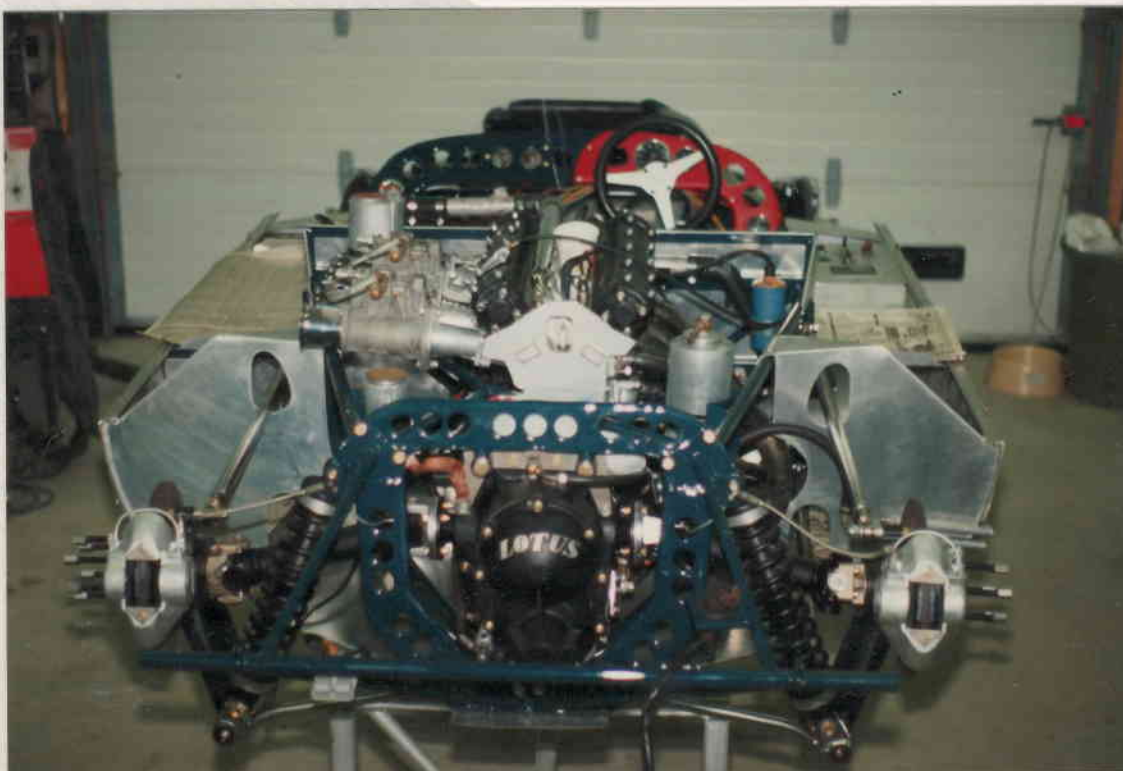

Side view and detail of
....uh....

Experimental recup pot.

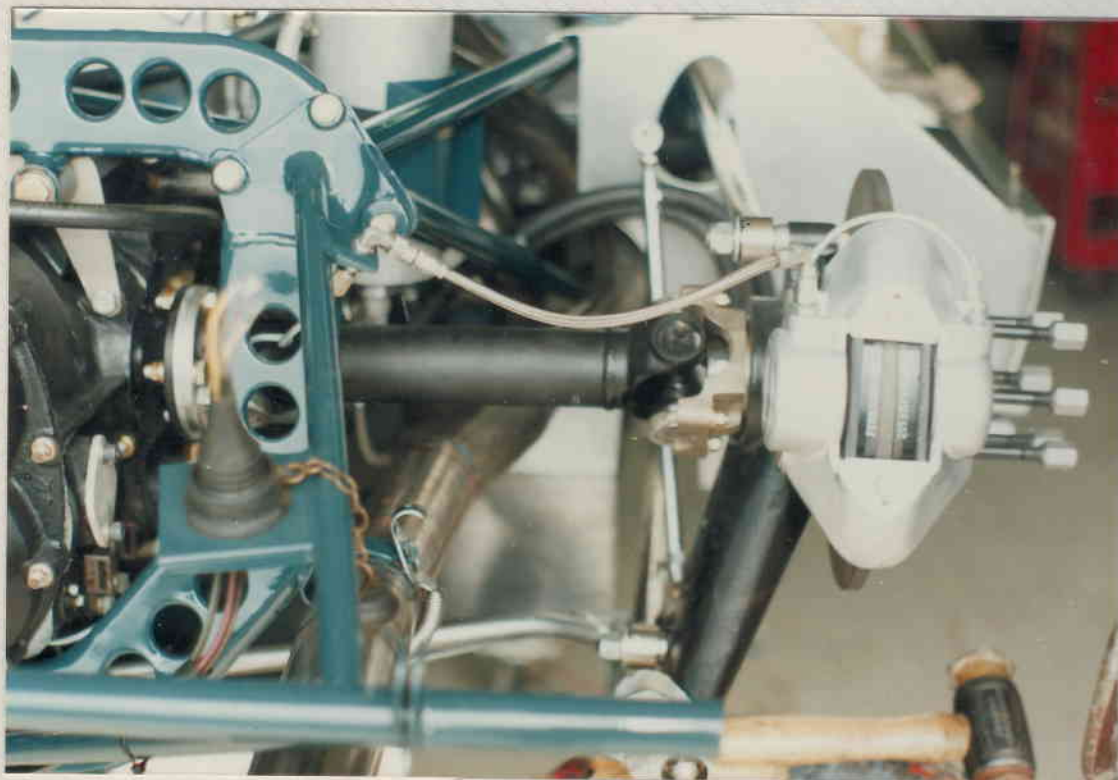

Rear end coming together.

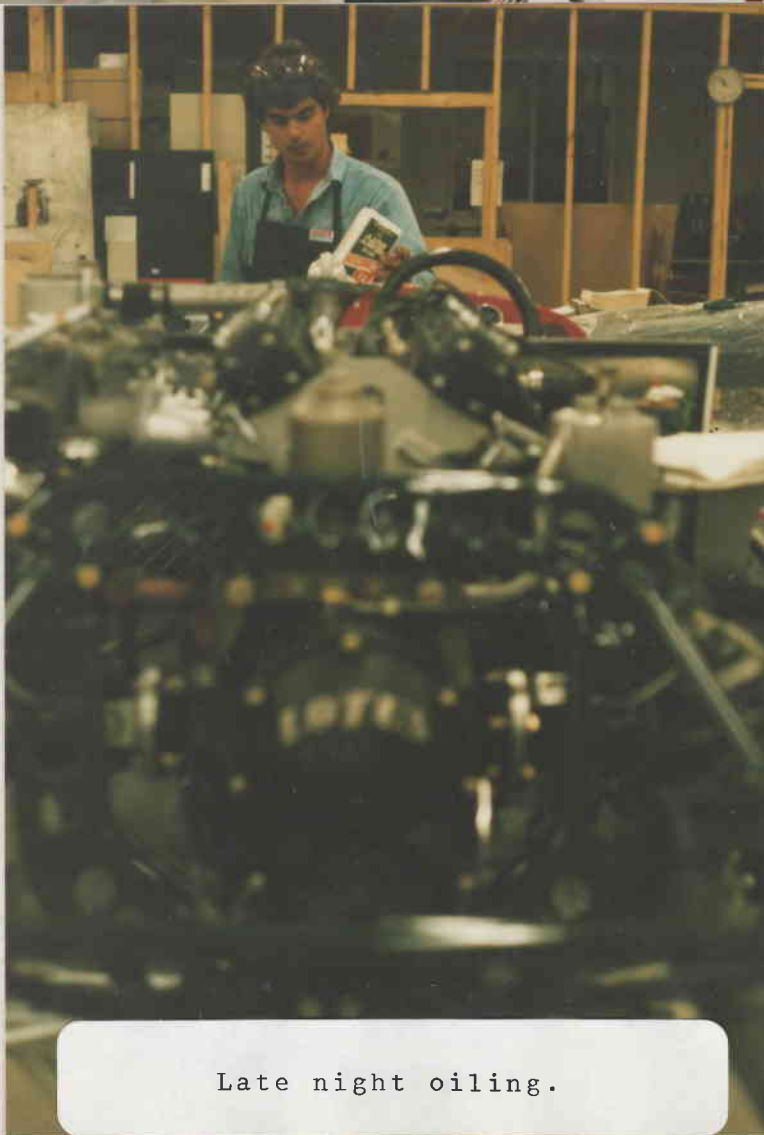

Gives you a queer feeling,
doesn't it?

TALK ABOUT
A TAIL
of WOE

Rear suspension.

Joan gets her way with harness.

Late night oiling.

mmmm....

good to the last drop.

Let's get this shitbox outa here.

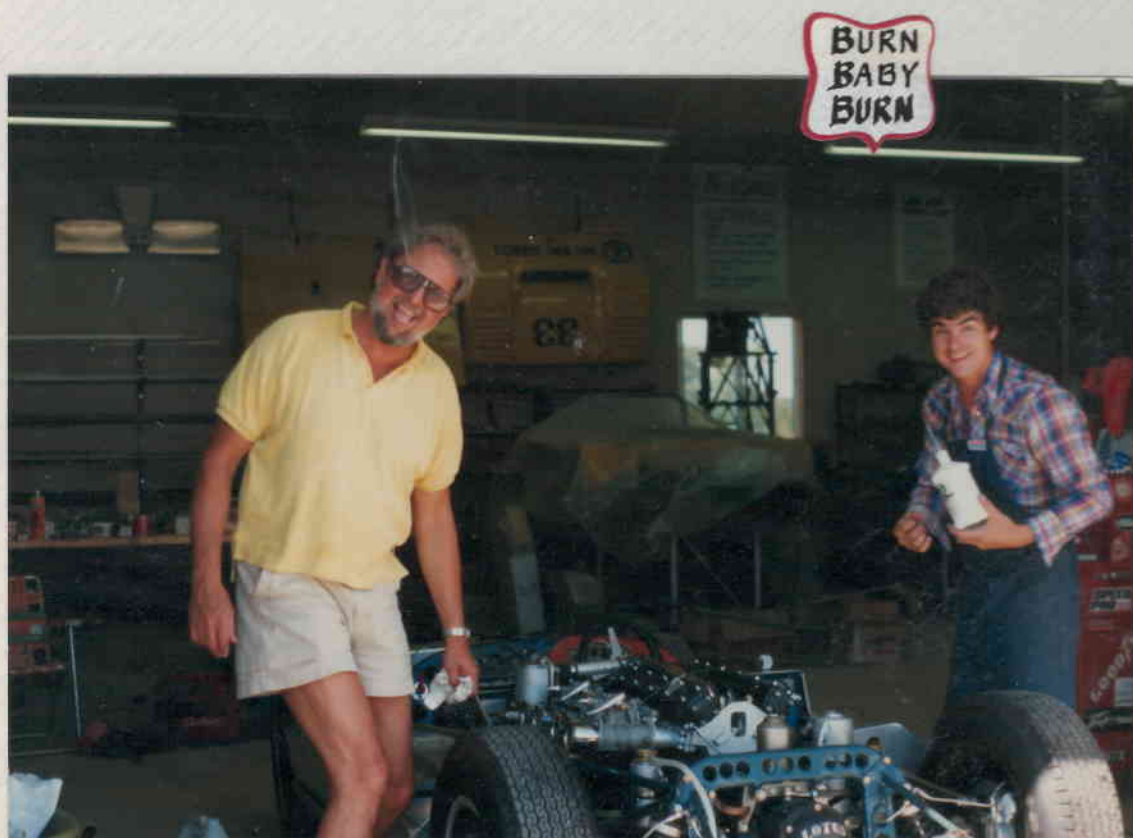

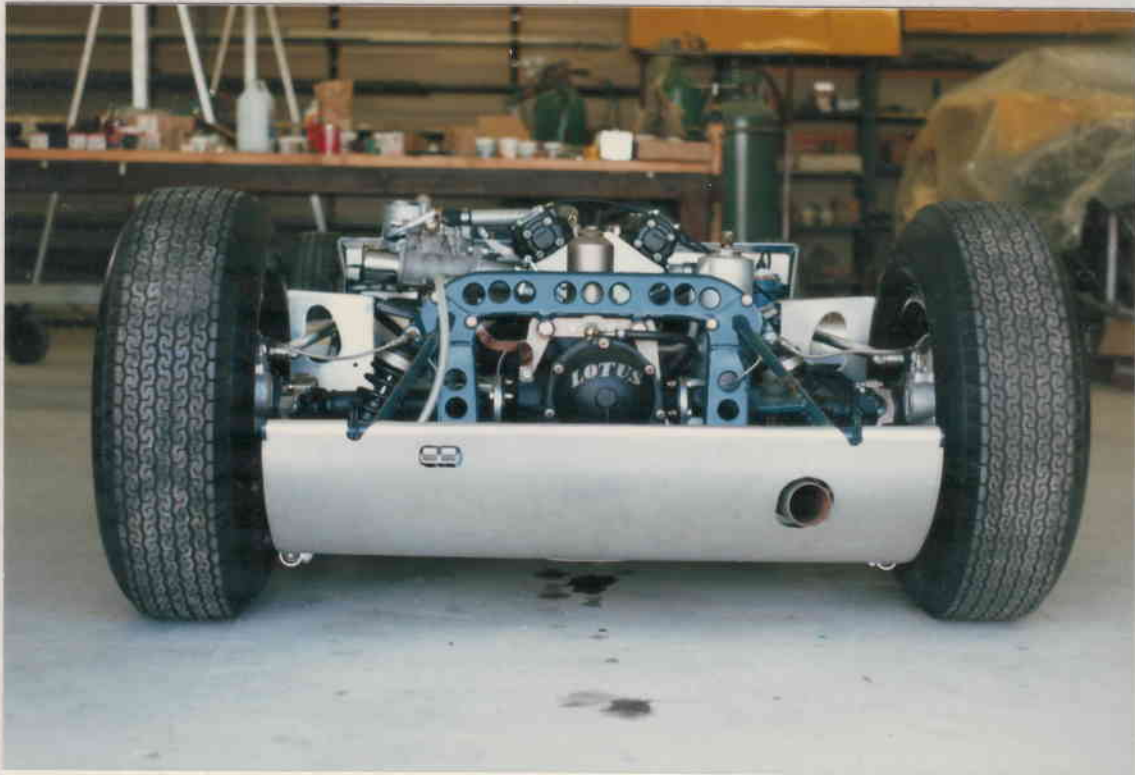

Okay, I take it back.
This is always a moment to treasure.

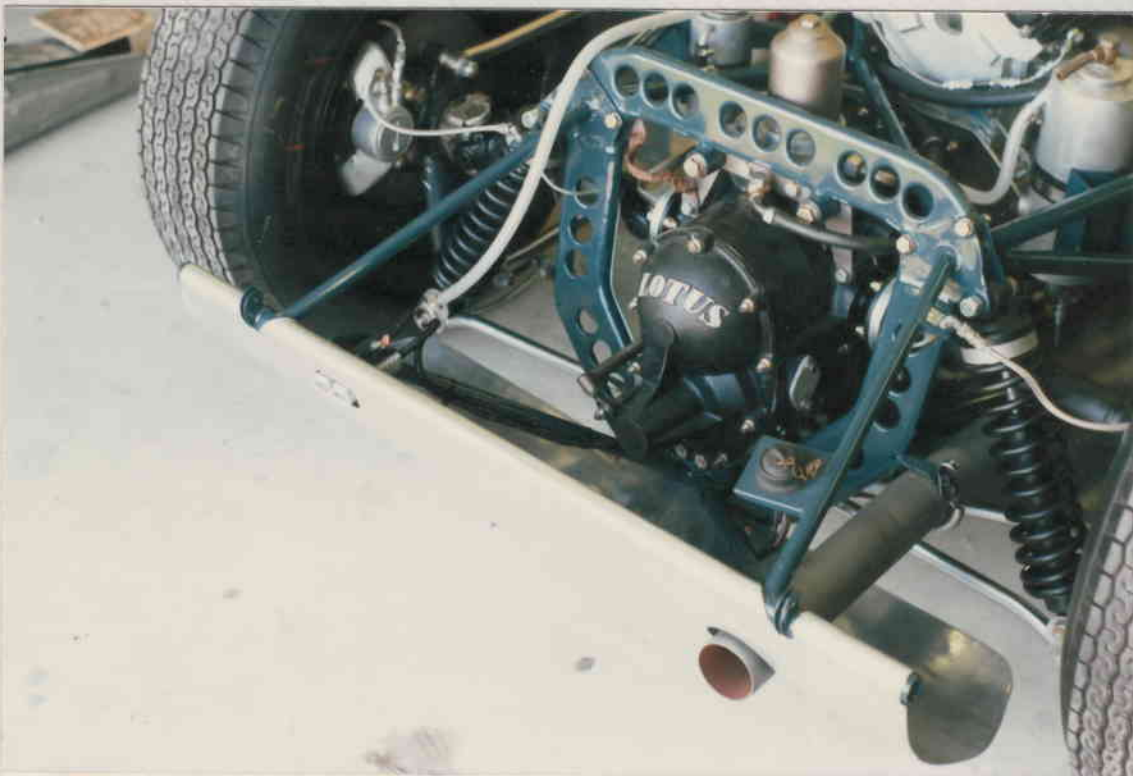

Another magic moment.

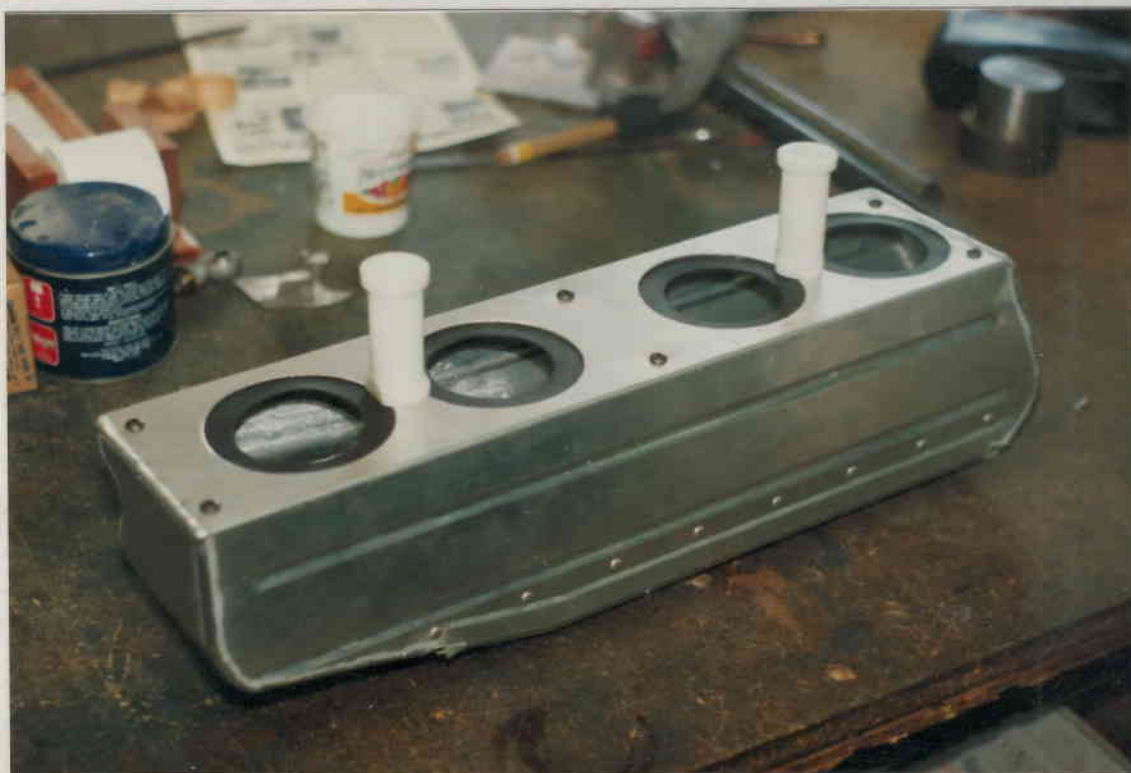

Lotus gets new tail pan.

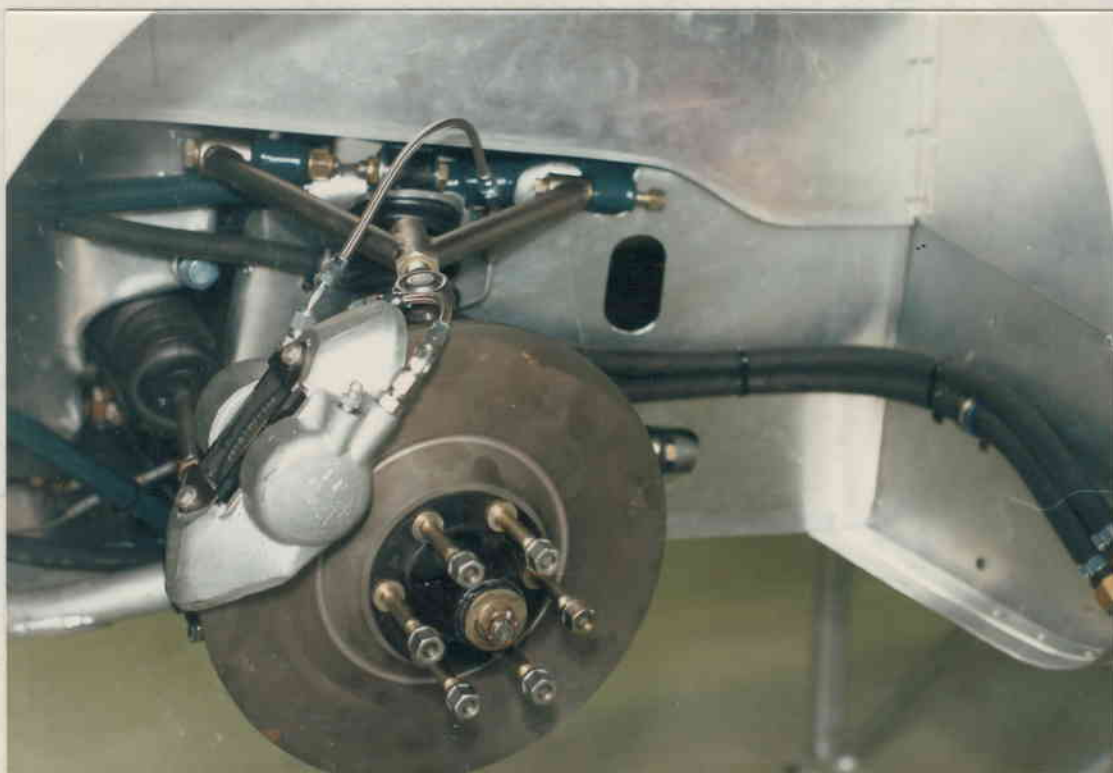

Details of airbox.

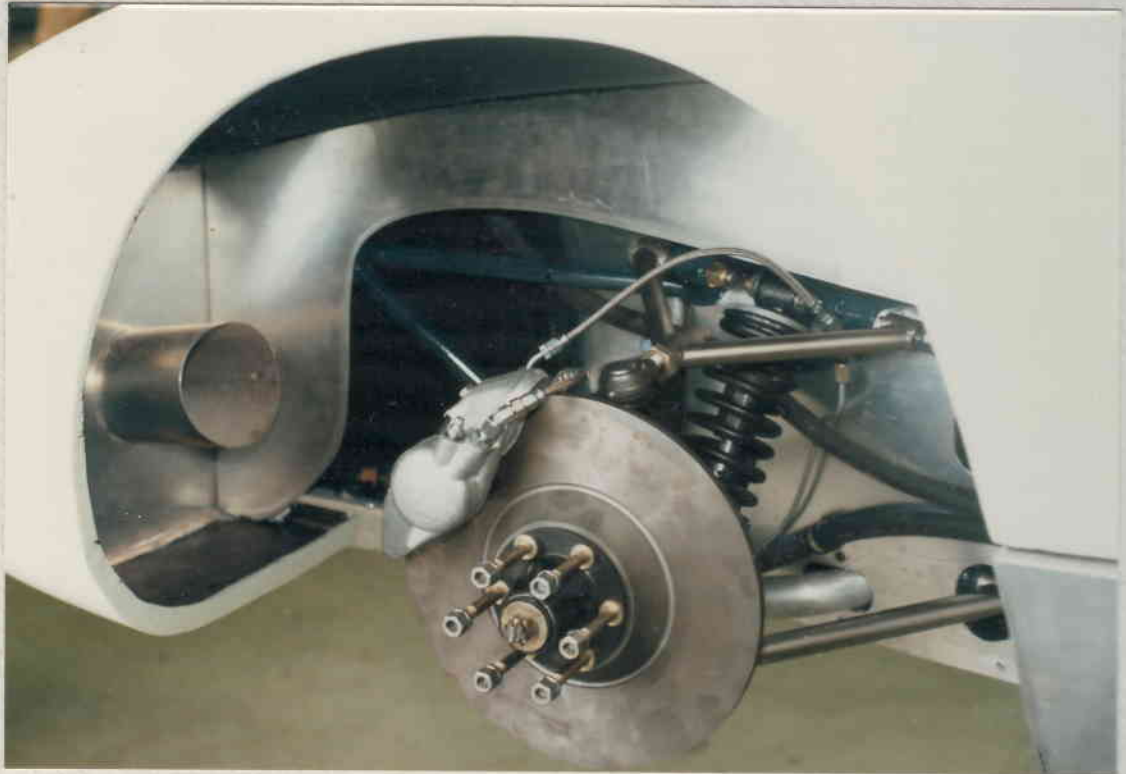

My favourite picture.

Front suspension.

Front wheel well.

Ain't she sweet.

Bring lots of kleenex.

BEWARE! she kicks.

Pushing her out for photos.

Where's MY
DINNER?

Santa Claus parade
anyone?

Faithful Remitter seems too happy.
...where is that Invoice?
